PROCEEDINGS OF THE ICM DIALOGUE

**East Asian Seas Congress 2006
Haikou City, Hainan Province, PR China, 14 December 2006**

1. INTRODUCTION

- 1.1. The ICM Dialogue was organized as part of the Inaugural Meeting of the PEMSEA Network of Local Governments for Sustainable Coastal Development (PNLG) during the East Asian Seas Congress 2006, hosted by the State Oceanic Administration of China, Hainan Provincial Government and Haikou City Government. The Dialogue was held 14 December 2006 at the People's Assembly Hall in Haikou City, Hainan Province, PR China.
- 1.2. The ICM Dialogue was conducted in seven language groups, namely: Bahasa, Chinese, Filipino, Khmer, Korean, Thai and Vietnamese. Each Dialogue was attended by the representatives of local governments in 26 integrated coastal management (ICM) sites, namely Bali, including its seven Regencies — Badung, Buleleng, Denpasar, Gianyar, Karangasem, Klungkung and Tabanan, and Sukabumi (Indonesia); Batangas, Bataan and Cavite (Philippines); Chonburi (Thailand); Danang and Quangnam (Vietnam); Nampho (Democratic People's Republic of Korea); Port Klang (Malaysia); Shihwa (Republic of Korea); Sihanoukville (Cambodia); Xiamen and the 10 ICM parallel sites in PR China (Panjin, Leting, Dongying, Qingdao, Lianyungang, Quanzhou, Yangjiang, Fangchenggang, Haikou and Wenchang).
- 1.3. Representatives and experts from national government agencies, institutions and PEMSEA also took part in the discussion. The Thai Dialogue was further enhanced by the participation of the Coastal Habitats and Resources Management (CHARM) representatives. The Filipino Dialogue included representatives from the Laguna Lake Development Authority and the Southern Mindanao Integrated Coastal Zone Management (ICZM) Project, who shared their experiences in integrated river basin and coastal management with the PEMSEA ICM sites.
- 1.4. The list of participants and the Meeting agenda are attached as Annexes 1 and 2 respectively.

2. ICM DIALOGUE

2.1. Plenary Session

- 2.1.1. Dr. Rafael Guerrero III, Executive Director of the Philippine Council for Aquatic and Marine Research and Development (PCARMD), chaired the plenary session. He welcomed the Dialogue participants and advised them of the agenda.
- 2.1.2. Dr. Jihyun Lee of PEMSEA presented on the objectives, mechanics and expected outputs of the ICM Dialogue. Key objectives of the ICM Dialogue were:
1. to provide opportunities for ICM sites to share their experiences, successes, failures and challenges in implementing ICM programs at the local level, without being constrained by language barriers; and
 2. to explore future long-term strategies for increasing information exchange and cross-project capacity development among ICM sites having a common language.
- 2.1.3 To facilitate the Dialogue, Dr. Lee suggested the following points of discussion:
1. common concerns/interests and capacity building requirements;
 2. strategies for increasing information exchange and cross-project capacity development among sites; and
 3. potential roles in facilitating the replication and scaling up of ICM practices.
- 2.1.4. The Dialogue participants were advised of the time limit, room allocations, the roles of facilitators and rapporteurs, and the expected outputs.

2.2. Group Workshop

- 2.2.1. In general, each Dialogue group discussed: common concerns/interests and capacity-building requirements; strategies for increasing information exchange and cross-project capacity development among the sites of a similar language, including website linkages, study tours and ICM training; and the potential roles of existing ICM sites in facilitating replication and scaling up of ICM practices in their respective countries.
- 2.2.2. **Bahasa Group.** The Bahasa Dialogue was facilitated by Mr. Alam Syah Mapparessa (Ministry of Environment, Indonesia) and Ms. Ni Wayan Sudji (Environmental Impact Agency – Bapedalda, Indonesia). Mr. Amin Bakerim (Selangor Waters Management Authority, Malaysia) served as rapporteur.

- 2.2.3. **Chinese Group.** The Chinese Dialogue was facilitated by Mr. Li Wenhai (SOA), Dr. Hong Huasheng (Xiamen University) and Mr. Zhou Lumin (Xiamen Ocean and Fisheries Bureau). Mr. Yang Yafeng (SOA) served as rapporteur.
- 2.2.4. **Filipino Group.** The Filipino Dialogue was facilitated by Mr. Robert Jara (Department of Environment and Natural Resources) and Ms. Evelyn Estigoy (Provincial Government-Environment and Natural Resources Office of Batangas). Ms. Anabelle Loyola-Cayabyab (Cavite ICM Project) and Ms. Maria Carmelita Reyes (Bataan ICM Program-Project Management Office) served as rapporteurs.
- 2.2.5. **Khmer Group.** The Khmer Dialogue was facilitated by Mr. Long Rithirak (Ministry of Environment). Mr. Prak Visal (Project Management Office, Sihanuokville ICM Site) served as rapporteur.
- 2.2.6. **Korean Group.** The Korean Dialogue was facilitated by Mr. Ri Jun Ho (General Bureau for Cooperation with International Organizations, DPRK) and Dr. Kim Jong-Deog (Korea Maritime Institute, ROK). Mr. Ri Ki Ho (Ministry of Land and Environmental Protection, DPRK) and Mr. Jungho Nam (Korea Maritime Institute) served as rapporteurs.
- 2.2.7. **Thai Group.** The Thai Dialogue was facilitated by Mr. Dhana Yingcharoen (Ministry of Natural Resources and Environment) and Ms. Suvaluck Satumanatpan (CHARM). Ms. Saowalak Winyoonuntakul (Department of Marine and Coastal Resources) and Mr. Sanchai Tandavanitj (CHARM) served as rapporteurs.
- 2.2.8. **Vietnamese Group.** The Vietnamese Dialogue was facilitated by Dr. Nguyen Minh Son (Danang ICM Program) and Mr. Hua Chien Thang (Ministry of Natural Resources and Environment), with Ms. Pham Thi Chin (Department of Natural Resources and Environment) serving as rapporteur.

2.3. Presentation of Dialogue Results

- 2.3.1. **Bahasa Group.** The results of the Bahasa Dialogue were presented by Mr. Mapparessa. The Group identified common concerns and interests such as pollution (land- and sea-based), coastal use and interagency conflicts, habitat conversion and degradation, stakeholder awareness and participation (paradigm shift), enhancing legislation arrangement, strengthening of law enforcement, effective usage of IIMS (Integrated Information Management System), and sustainable financing mechanisms. Identified site-specific concerns included: Bali — tsunami, coastal erosion, eutrophication/red tides, and illegal discharge of oily waste; Sukabumi — tsunami, sedimentation and coastal use rearrangement; and Port Klang — sedimentation and ballast water discharge. With regard to capacity-building requirements, the Group

recognized the need for regional/national ICM forums for local leaders as well as technical ICM training for core staff and stakeholders.

2.3.2. The Group recommended several strategies for increasing information exchange and cross-project capacity development:

1. Website linkages in Bahasa/Malay
 - Regular data/information updating
 - Establishing intra-country and inter-country site mailing lists
 - Website interaction
2. Study tours
 - Needs assessment for study tours
 - Developing a work plan for intra-country and inter-country site study tours
3. ICM training
 - National/local training needs assessment
 - Regional/national ICM forum for local leaders
 - Developing curriculum for national/local ICM and thematic training
 - Developing partnerships for the conduct and management of ICM training

2.3.3. The Group defined potential roles in facilitating replication and scaling up of ICM practices at both national/provincial and local levels:

1. National/Provincial governments
 - Coordinating concerned national institutions for finalizing/adopting a Coastal Management Act
 - Developing/enhancing concepts and strategies for national ICM replication
 - Establishing national/provincial ICM task forces
 - Provision of technical assistance/mobilization of task force groups
 - Monitoring, controlling and evaluating ICM development and implementation at local levels.
2. Local governments
 - Maintaining commitments for ICM replication
 - Preparing for ICM development and implementation, including administrative/organizational arrangements, local budget, staff commitments and training of core staff.

2.3.4. **Chinese Group.** The results of the Chinese Dialogue were presented by Dr. Hong. The Group identified the following common concerns:

- Maintaining harmonious economic development and ecological/environmental protection;
- Integrating land and sea use in marine zoning schemes;

- Exchanging experiences and lessons learned at different parallel sites among different countries;
 - ICM mechanism, partnership, legal system and enforcement; and
 - Monitoring and improving information management through a GIS information system (e.g., ecological habitation).
- 2.3.5. To strengthen information exchange among the parallel sites, the Group suggested that SOA allocate some funds to organize study tours and training and support the participation to the PNLG forum; and for parallel sites to strengthen capacity building through training.
- 2.3.6. With regard to the role of Xiamen, the Group suggested that the PNLG should provide a platform for information sharing, such as: document translation and distribution; PNLG website development and updating; capacity building through the Xiamen International Training Center for Coastal Sustainable Development (ITC-CSD); and workshops and study tours for participants in local and regional areas.
- 2.3.7. **Filipino Group.** The results of the Filipino Dialogue were presented by Ms. Estigoy. The Group identified the following key common concerns/interests and capacity-building requirements:
- Limited political will and the terms of office of local executives;
 - Changes in membership of the coordinating committee resulting in lack of follow-through in implementation;
 - Weak involvement of the youth sector and elderly and the need to strengthen the educational curriculum and sharing within families and communities;
 - Weak institutional mechanism: need to create awareness and build capacity at national, provincial and local levels; need to develop linkages among various government agencies, LGUs, private sector and other stakeholders and to adopt policy reforms to avoid overlapping or duplication of work
 - Sharing of information and resources: need to strengthen volunteerism and coordination; and need to emphasize the mutual benefits to be derived
- 2.3.8. The Group discussed the following strategies for increasing information exchange and cross-project capacity development among sites:
- Capacity building from national down to the *barangay* level; conduct of ICM training for local governments; existing ICM sites (Batangas, Bataan and Cavite) can share their experiences and acquired skills, e.g., coastal strategy development, coastal use zoning plan, environmental monitoring, public awareness and stakeholder participation, habitat rehabilitation, community-based activities, etc.; national government can assist and

provide technical assistance to local governments, e.g., oil spill response, hazard management, waste management, etc.;

- Use of the IIMS for data management and sharing;
- Creation of national network of local governments implementing ICM (Philippine counterpart for the PNLG) to promote ICM, knowledge sharing and develop linkages;
- Involvement of the families and communities in coastal area management;
- Review of all ongoing projects related to ICM in view of harmonizing/aligning CRM and ICM programs/projects;
- Review and amendment of the Local Government Code in relation to the role of the Department of Environment and Natural Resources (DENR) and Executive Order 533; and
- Use of the website for data sharing and linkage.

2.3.9. The Group defined potential roles in facilitating replication and scaling up of ICM practices, including:

- Integration of watershed and coastal management strategies, such as in Manila Bay and Sarangani Bay;
- Reactivation of the Philippine Council for Sustainable Development;
- Implementation of the provisions of E.O. 533;
- Study tours and an ICM summit to create linkages and sharing of experiences; and
- Promotion of corporate social responsibility in the private sector.

2.3.10. Finally, the Group recommended some criteria for selecting ICM replication sites:

- Local government initiative and support (e.g., through allocation of budget/resources and staff);
- Economic need and viability of the area;
- State of the environment and resources in the area;
- Partnership with the private sector;
- Participation and commitment of stakeholders;
- Co-management approach;
- Involvement of Regional Development Councils in expansion and scaling up of ICM; and
- An incentive system.

2.3.11. **Khmer Group.** The results of the Khmer Dialogue were presented by Mr. Visal. The Group identified key concerns and issues related to the sustainability of the Sihanoukville ICM Project: political stability; political will/support from national level stakeholders; public awareness; and stakeholder participation and financing.

2.3.12. The Group suggested the following strategies for continuing the momentum for ICM implementation and identified the major challenges of local and national governments:

- Monitoring and evaluation of ICM projects
- Implementing information management (IIMS)
- Strengthening commitments, responsibilities and participation of national and local agencies and nongovernmental organizations and people's organizations (NGOs/POs)
- Improved law enforcement
- Financial support by the national government for ICM implementation at the local level
- More emphasis on sustainable utilization of natural resources

2.3.13. **Korean Group.** The results of the Korean Dialogue were presented by Mr. Ri Jun Ho. He reported that the Group shared the importance and necessity to strengthen management capacity and exchange information between Nampho and Shihwa ICM sites through PEMSEA activities. The Group highly recognized the synergy effect through the PNLG, in particular the ICM Dialogue. The Group recommended that the ICM Dialogue be continued as a side event of PNLG, highlighting the need to further discuss the operational mechanism of the ICM Dialogue.

2.3.14. **Thai Group.** The results of the Thai Dialogue were presented by Mr. Tandavanitj. The Group identified key common concerns and interests, including limited or insufficient understanding and knowledge of ICM, weak linkage between local and central governments, national agenda or national commitment not yet in place, and the weak process of information exchange. The Group recommended strategies for increasing information exchange and cross-project capacity development among the sites including: capacity and awareness building for local users as well as relevant government officers; website linkages; workshops or seminars among ICM implementing units, projects or programs; and study visits to various sites.

2.3.15. The following potential roles were defined to facilitate replication and scaling up of ICM practices:

- Political commitment and national agenda
- Creation of driving forces such as a national coastal policy, national legislation and coordinating units at both local/provincial and national levels
- Establishment of project pipelines at all levels
- Integration of upstream and downstream resource users and reinforcing existing national laws and regulations

2.3.16. The Group recognized the value of the ICM Dialogue, which provided valuable opportunities for interaction between the Chonburi ICM program and CHARM. The Group concluded that ICM is not new to Thailand and has been implemented for years, and that it is now time to adopt it to Thai culture and styles.

2.3.17. **Vietnamese Group.** The results of Vietnamese Dialogue were presented by Dr. Nguyen Minh Son. The Group identified three main areas of common concern and interest: 1) political support; 2) coordination and cooperation; and 3) technical capacity, including specifically the following:

- ICM institutionalization at both national and local levels
- Establishment of an ICM national center to support ICM in Vietnam (guiding, training, tools development, networking, technical assistance)
- Creation of an ICM unit (or ICM mandate in an existing unit) at the local level
- Change of perception of leadership through study tours and training
- Implementation of ICM strategies and action plans, and development and implementation of issue-specific action plans
- Development of a national training program for local governments (for human resources development, focusing on training of trainers, coastal managers)
- Development of a training center for ICM practitioners in Danang

2.3.18. The Group identified the following strategies for information exchange and capacity building among the sites:

- Public awareness nationwide, with a focus at the local level
- Training, meetings, workshops and study tours
- A national center to support ICM in Vietnam (e.g., training, networking, GIS, IIMS and website)
- IIMS use at the national and local levels, and the development of commitments among ICM sites and the national government on information exchange

2.3.19. The following potential roles for ICM replication and scaling up were identified:

- Vietnam Environment Protection Agency (VEPA) is responsible for studying the development of a national ICM center to support ICM in Vietnam, establishing a national ICM network, developing policy/strategy/legislation/national ICM programs, and guiding the provinces
- Danang will develop and implement the second cycle of the ICM program on its own
- The national government will assist other sites in Vietnam to start up ICM programs, and study the development of an ICM practitioners training center in Danang
- Quangnam will strengthen its PCC and PMO, and implement an MOU with PEMSEA
- Other provinces will develop ICM projects on their own.

3. CONCLUDING REMARKS

Dr. Guerrero appreciated the active participation of Dialogue participants and recognized that the ICM Dialogue was a valuable venue to facilitate effective communication among local leaders and practitioners, who are involved and interested in ICM implementation. In conclusion, he summarized the workshop recommendations as follows:

- Conduct review of ongoing ICM projects and initiatives
- Promote national networking of various ICM projects and initiatives
- Establish national coordinating/partnership mechanism
- Create national driving force for ICM scaling up
- Organize regional/national training workshops/ forums
- Adjust existing ICM efforts to reflect unique culture and socioeconomic situations
- Promote information exchange through websites, cross-site study tours and workshops within countries or between countries
- Use the Integrated Information Management System (IIMS) for data sharing, e.g., GIS and website development
- Join the PNLG and continue the ICM Dialogue as part of PNLG activities.
