The 6th Ministerial Forum
East Asian Seas Congress 2018
November 29, 2018

WE, the Representatives of eleven countries bordering on the Seas of East Asia have gathered in Iloilo City, Philippines, on the 29th day of November 2018 to re-affirm our shared commitments for the sustainable development of the Seas of East Asia to reach our shared vision for healthy oceans, people and economies of the region. On this auspicious occasion, as we together celebrate PEMSEA’s twenty-five years, we reflect our satisfaction on the achievements that we have collectively realized and consider our joint future direction.

WE RE-AFFIRM our shared commitments made in Putrajaya, Malaysia (2003) to work together towards the sustainable development of the region’s coasts and oceans with a common platform under the Sustainable Development Strategy for the Seas of East Asia (SDS-SEA).

WE REMAIN steadfast in our commitments under the Manila Declaration (2009) on strengthening the implementation of Integrated Coastal Management for sustainable development and climate change adaptation; the Changwon Declaration (2012) on moving toward an ocean-based blue economy; and the Da Nang Compact (2015) on aligning our strategies in the SDS-SEA with global goals and targets such as the Sustainable Development Goals (SDGs) under the United Nations’ 2030 Agenda for Sustainable Development, Aichi Biodiversity Targets under the Convention on Biological Diversity (CBD), and the Paris Agreement under the United Nations Framework Convention on Climate Change (UNFCCC).

WE ACKNOWLEDGE the significant value and critical contribution of coastal and marine ecosystems goods and services to securing food and jobs; helping to eradicate poverty and building resilient coastal communities and blue economies in the East Asian region. Juxtaposed against these opportunities is the vulnerability of the region to climate change and other environmental threats such as marine-related disasters, destruction and loss of habitats and natural coastlines, biodiversity loss and degradation, overfishing and lack of food security, pollution from land and sea-based sources, and impairment of water quality, water supply and water security.

WE NOTE the bold strides that we have collectively taken to transform PEMSEA from a mere program into a self-sustaining regional organization to work towards achieving our shared vision.

WE FURTHER NOTE with pride and appreciation, PEMSEA’s pioneering work in the region to develop best practices in the design and implementation of the Integrated Coastal Management (ICM) approach. PEMSEA is also at the forefront of developing knowledge and capacity to build climate smart policies and enable ocean-based blue economies.
WE BELIEVE that PEMSEA remains relevant and is well-positioned to continue performing its role as the regional platform to encourage the development of common policies, building capacity and orchestrating essential collaborative and scaled up actions alongside smart financing to deliver economic and social dividends as well as protect biodiversity and address shrinking coastlines.

WE BELIEVE FURTHER that because of its competence, pool of experts, and related body of information generated through its years of work on the ground, PEMSEA has established itself as the coastal and marine knowledge center that can support the region in the effective implementation of the SDS-SEA aligned with the UN SDGs and other international and regional commitments.

WE ARE CONFIDENT that PEMSEA will continue to facilitate regional cooperation to respond to the challenges within the context of the rapidly changing social, political, economic and environmental landscapes and encourage the region to move towards a Blue Economy and Sustainable Development of its coasts and oceans.

OUR COMMITMENTS TO A SUSTAINABLE FUTURE

1. We will continue to work to achieve the remaining targets set under the Danang Compact by 2021, namely,
   a. 25% ICM coverage of the region's coastlines, and
   b. the adoption and implementation of ICM national laws and policies in all countries in the region.

2. We will regularly update the State of the Oceans and Coasts reports to highlight the contributions of coasts and oceans to economies. We further commit to establish environmental, social and economic indicators, where appropriate, to measure the development impact of initiatives on the state of the coasts, communities and economies.

3. We recognize the importance of the PEMSEA Resource Facility as the coordinating mechanism for the implementation of the SDS-SEA. We commit to support its operations through voluntary country contributions beyond 2019.

4. We support PEMSEA’s efforts in identifying and developing blue economy investments at the national and local level. We welcome opportunities to work with our partners, both government and non-government, to develop, finance and implement blue economy projects in ICM sites as well as activities set forth in the SDS-SEA Implementation Plan 2018-2022.

5. We acknowledge the current strong momentum to tackle marine debris globally. We commit to significantly reducing or preventing marine pollution of all kinds, in particular from land-based and sea-based activities, including marine litter and nutrient pollution.

6. We commit to implementing policies and programs for the sustainable management of coastal tourism destinations. If properly planned and managed, coastal tourism will benefit the environment, the people and the economy. Sustainable tourism planning not only considers social, environmental and economic impacts within the tourist area or facility itself, but also the impacts on the host coastal community, including livelihoods, water and food security, solid waste disposal, water pollution and social and environmental factors.
7. We realize the critical importance of regional collaboration in dealing with coastal and marine hazards such as storm surges and tsunamis. We commit to working together to adopt innovative strategies to raise awareness and build regional capacity to monitor, forecast and provide timely early warnings to support safety of life and property at sea, coastal management and minimization of impact of such hazards.

8. We recognize that we are all parties to the Paris Agreement and the UNFCCC and aware of the urgency and seriousness of the threat of climate change to the sustainable development of our countries and region; We commit to implement adaptation and mitigation strategies to respond to climate change.

**PARTNERSHIPS**

*We are aware* that achieving our goals will require the support of all stakeholders across sectors; We will continue our efforts to improve cooperation and engagement between PEMSEA and other countries, relevant international development organizations, local organizations, the private sector, financial institution and investors, nongovernment organizations, academic and research institutions, communities and grassroots, women and youth organizations.

*We agree* to step up the cooperation with regional organizations to achieve the targets under the SDS-SEA; We recognize the opportunities for increased knowledge, efficiency gains and effectiveness when collectively addressing implementation challenges.

*We are determined* to continue working together as PEMSEA country partners to deliver our common objectives in line with the SDS-SEA and our regional and global commitments. We are convinced that through our collective actions, PEMSEA will lead to more effective solutions with positive impacts on coastal communities and ecosystems as evidenced in the next regional State of Oceans and Coasts report in 2022.

**CONCLUSION**

The biggest threat that we face in the region is ourselves, in the way we live our lives and the way we manage our resources. We therefore strongly urge everyone to shift towards a mindset of responsible stewardship, and pledge to take bold steps to protect, manage and restore our coasts and oceans for our present and future generations. PEMSEA Country Partners are ready to engage citizens in East Asia and peoples in other regions to work together to secure our shared vision of healthy oceans, people and economy.
Adopted in Iloilo City, Philippines, this 29th day of November, 2018.

The Kingdom of Cambodia

Hon. Vann Monyneath
Deputy Secretary General
National Council for Sustainable Development
Ministry of Environment

The People’s Republic of China

Hon. Zhang Zhi
Director General
International Cooperation
Ministry of Natural Resources

The Democratic People’s Republic of Korea

Hon. Ri Myong San
Vice Minister
Ministry of External Economic Relations

Republic of Indonesia

Hon. M.R. Karliansyah
Director General
Environmental Pollution and Degradation Control
Ministry of Environment and Forestry

Japan

Hon. Hiroyuki Masuda
Deputy Minister for Technical Affairs
Ministry of Land, Infrastructure, Transport and Tourism

Lao People’s Democratic Republic

Hon. Xayaveth Vixay
Director General
Ministry of Natural Resources and Environment

Republic of the Philippines

Hon. Rodolfo Garcia
Undersecretary
Department of Environment and Natural Resources

Republic of Korea

Hon. Jun-Kwon Park
Commissioner
Korea Maritime Safety Tribunal
Ministry of Oceans and Fisheries

Hon. Amy Khor
Senior Minister of State
Ministry of the Environment and Water Resources

The Democratic Republic of Timor-Leste

Hon. Cesar Jose da Cruz
Secretary-General
Ministry of Agriculture and Fisheries

The Socialist Republic of Viet Nam

Hon. Vu Si Tuan
Deputy Administrator
Viaet Nam Administration of Seas and Islands
Ministry of Natural Resources and Environment
