The Charter of
the PEMSEA Network of Local Governments for
Sustainable Coastal Development

Preamble

1. The Regional Network of Local Governments implementing Integrated Coastal Management (herein referred to as RNLG) was officially launched by the GEF/UNDP/IMO Regional Programme on Partnerships in Environmental Management for the Seas of East Asia (PEMSEA) in March 2001 as a forum for exchanging information and experiences in integrated coastal management (ICM) practices among local governments of the region. For the past several years, we have witnessed how ICM practices lead to improved governance of marine and coastal resources, and resulted in on-the-ground social, economic and environmental gains in our communities.

2. The RNLG has proven to be a unique and valuable partnership arrangement among local governments, focusing on the special challenges of coastal cities, municipalities and provinces with regard to sustainable growth and development, and providing a vehicle for sharing practical experiences, technical skills and management know-how on ICM practices among its members.

3. The Sustainable Development Strategy for the Seas of East Asia (SDS-SEA), as adopted by our national governments in December 2003, recognizes the vital role of local governments in the collective effort of all stakeholders to reverse the continuing destruction and decline of our common heritage. The SDS-SEA challenges local governments in coastal areas throughout the region with the formidable task of reducing conflicting and non-sustainable usage of natural resources in their respective watershed and coastal seas, through the application and replication of ICM programs.

4. Our network, the RNLG, can make a valuable contribution to this regional effort, by encouraging non-member local governments to develop and implement ICM programs. We have the advantage of experience, skills and knowledge that are required for successful ICM application. Working within the framework of PEMSEA, we also have the advantage of accessing higher levels of government, international agencies, donors, and the private sector to support our cause and to ensure that local governments of the region are well equipped to turn environmental concerns into economic and employment opportunities and to facilitate their speedy resolution.

5. Therefore, the RNLG members decided to adopt the “Bali Resolution on the Establishment of the PEMSEA Network of Local Governments for Sustainable Coastal Development (PNLG)” on 27 April 2005, at Bali, Indonesia.

Wherefore, we, the representatives of the members of the PNLG, do hereby ordain and promulgate the following charter.
